

CHINA ACCELERATION

CDNetworks: The Choice for Extending Your eBusiness, eCommerce, and Web Applications into China

CDNetworks makes it easy for Fortune 2000 businesses to successfully and cost-effectively deliver web content and applications into China. Our licensed business operations and optimized content delivery infrastructure in China set us apart. In fact, we are the only content delivery network (CDN) provider to offer full scalability, reliability, and performance for content and application delivery both in China and Internet across the globe.

***Hong Kong and Taiwan are provided for global service only**

CDNetworks eases your entry into China through our in-depth local knowledge and experience with navigating the business and governmental landscape. We monitor and respond to the evolving rules and regulations imposed by China's central and provincial governing authorities that impact businesses' revenue-generation opportunities. We back our China business savvy with a robust CDN infrastructure that optimizes content and application delivery across China's multiple ISPs. This optimization is critical as China's Internet experiences ever-increasing levels of congestion resulting from strong end-user growth and increasing consumer demand for engaging websites and high-bandwidth applications.

Our unique in-China expertise, locally licensed business operations, superior CDN infrastructure, and over 10 years of providing service to China, combine to make CDNetworks the only logical choice for Internet content and application delivery to the world's largest and fastest growing market.

CHINA ACCELERATION

Why CDNetworks for Content Delivery into China

TRULY IN CHINA, BUT WITH A GLOBAL REACH

With 25 POPs and growing in mainland China, CDNetworks provides leading companies with 55 Gbps of capacity to local users. This complements our 100+ POPs located across 6 continents that provide a global capacity of more than 1,100 Gbps.

LOCAL KNOWLEDGE OF CHINA'S BUSINESS/GOVERNMENT LANDSCAPE

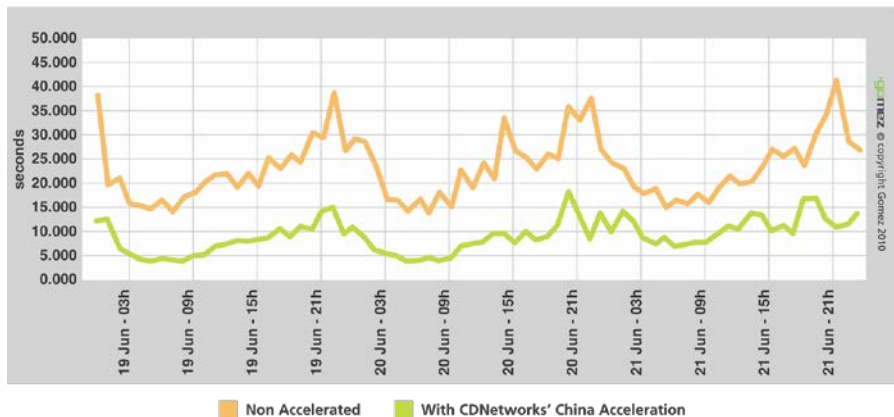

Keeping track of changing rules and regulations and minimizing their effect on your business is a standard part of our superior customer support.

ABILITY TO OVERCOME CHINA'S INTERNET FLAWS

Our support teams and technologies monitor and route content and applications for optimal delivery with minimal latency across China's Internet to Chinese end users. This ensures high levels of satisfaction for site visitors and maximum revenue generation for you.

Improve the User Experience with China Acceleration

The following example compares the performance of a downloaded page (20KB with eight embedded objects). The orange line shows the non-accelerated performance from an origin based in Korea delivered to end users in China. The green line shows that same page accelerated with CDNetworks' China Acceleration solution. Note the 2X – 8X performance improvement.
