

CLOUD STORAGE

Introduction

CDNetworks offers a managed, cloud-based storage service that is scalable, high performance, secure, and fault tolerant. You simply upload your content to one of our storage locations by using individual username and password. Once uploaded, CDNetworks storage service replicates this content across two or more storage locations. Global Server Load Balancer (GSLB) continuously monitors storage servers for network health and works around problematic locations routing clients to the optimal storage location. CDNetworks' Cloud Storage has been purpose-built to address the web performance needs of enterprises. It is natively integrated with our Web Performance Suite (WPS) and our SMART Caching software is optimized to pull content from Cloud Storage that provides accelerated content delivery to your users across the world. This provides maximum performance and scalability benefits at a low cost and allows you to focus on your core business.

Key Features and Benefits

Feature	Description	Benefit
Security	SSL transport Strong password authentication	Secures data transfer Prevents unauthorized access
Reliability	Multiple, physically separate node locations (in US & EU). Automatic replication to multiple locations. RAID 6	High availability. Safeguard from catastrophes. Ability to survive disk failure during data recovery.
Scalability	Multiple TB per location. Easily expandable. No limit on individual file size.	Virtually unlimited storage.
Performance	Drive interface: SATA 3.0 Replication across nodes on multiple continents.	Data transfer at 6Gb/second. Faster transfer for multimedia. Faster transfer for dynamic applications. Data is accessed from geographically closest node.
Flexibility	Upload: ftp, sftp, rsync. Ability to create directories.	Standard file transfer methods very familiar to users.
Advanced	CDN integration	Works optimally with SMART Caching software to improve performance.
Reporting	Web-based portal. Real-time reporting.	Immediate visibility on usage and billing. Integrated ticketing system.

CLOUD STORAGE

About CDNetworks

CDNetworks enables mission critical e-business in the world's most challenging markets. CDNetworks' unique position as the only multinational CDN with expertise and infrastructure in China, and other emerging markets, makes us a trusted technology and business advisor to more than 1,200 companies across the highly-competitive industries of software, travel, eCommerce, high tech, manufacturing, media, and gaming. Reliably delivering over-the-top performance anywhere in the world, CDNetworks helps businesses get closer to their end users without the limitations of hardware and private networks. Founded in 2000, CDNetworks has offices in the U.S., Korea, China, Europe, and Japan. For more information, please visit: www.cdnetworks.com
