

WAAP

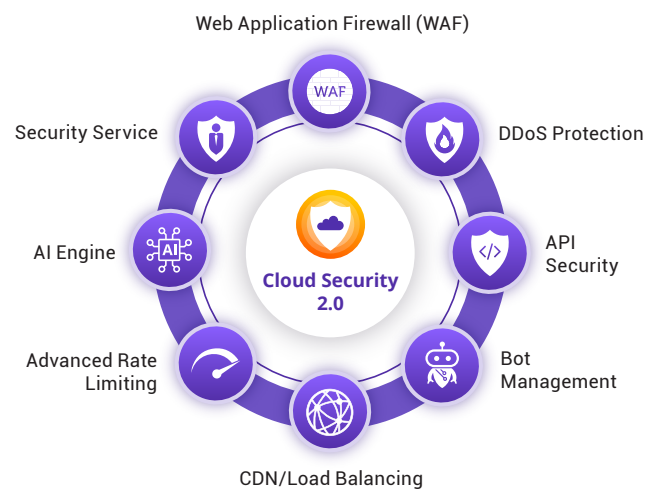

Cloud Security 2.0

AI-powered cloud security solution for web applications and APIs.

Modern Security for Web Applications and APIs

Cloud Security 2.0 is a cloud-native WAAP (Web Application and API Protection) platform that delivers integrated DDoS protection, Web Application Firewall (WAF), Bot Management, and API Security with real-time, adaptive protection across a global edge network.

One Platform to Secure Web Applications and APIs

| | | | | |
|---|---|---|--|--|
|  DDoS Protection Adaptive defense for L3/4 and L7 DDoS attacks. |  Web Application Firewall (WAF) Protection against OWASP Top 10 and zero-day attacks. |  Bot Management Detects and mitigates malicious bots without disrupting real users. |  API Security Protects APIs with full lifecycle discovery and threat detection. |  Security Services Provides 24/7 monitoring, expert analysis, and incident response. |
|---|---|---|--|--|

Stronger Security. Built for Modern Threats.

Comprehensive Protection

Protect web applications and APIs with layered defenses designed to stop both common attacks and advanced threats before they disrupt users or business operations.

AI-powered Detection

Leverages advanced AI to identify threats in real time with high precision, reducing false positives and minimizing manual tuning.

Adaptive Defense

Keep pace with evolving attack techniques through protections that continuously adapt, reducing the need for constant manual policy updates.

Security at the Edge

Apply real-time protection across a global edge network to secure traffic closer to users while maintaining fast, reliable digital experiences.

Unified Visibility and Control

Provides centralized insights and controls through a unified console with real-time alerts, and granular controls.

24/7 Expert Support

Around-the-clock access to security experts for monitoring, investigation, and rapid incident response.

Integrated Security Capabilities

Security & Defense

- ✓ Adaptive Protection
- ✓ L3/L4 to L7 Protection
- ✓ Zero-Day Protection
- ✓ Advanced Bot Management
- ✓ Behavioral Analysis
- ✓ Threat Intelligence

Management & Control

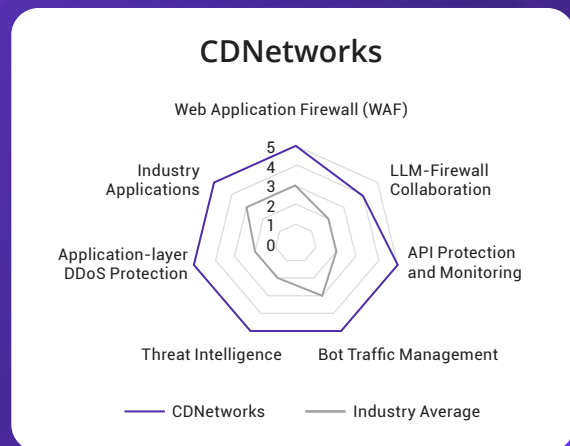

- ✓ One-Click Deployment
- ✓ Unified Log & Visibility
- ✓ Flexible Custom Rules
- ✓ Rate Limiting
- ✓ SIEM Integration

Global Capacity. Proven Resilience.

| | | | | |
|---|---|--|--|--|
| 2,800+ Global CDN PoPs | 90+ Countries & Regions | 20+ Tbps Global scrubbing capacity | 40+ Global scrubbing centers | 90% WAF domains in block mode |
| 1+ Billion Threat intelligence data scale | 2.09 Tbps Largest L3/L4 DDoS attack mitigated | 34.7M RPS Largest L7 DDoS attack mitigated | 3.3+ Billion Average daily cyberattack mitigated | 100+ Professional security experts |

CDNetworks Recognized for **Strong WAAP Capabilities** in China WAAP Vendor Technology Capability Assessment 2025

Trusted by Global Companies

"CDNetworks has proven to be a partner we can count on across the board, from solutions and services to local presence. Their integrated solution and dependable support offer peace of mind that is essential to maintaining our operational resilience."

Mr. Tran Minh Thang
CIO at Petrolimex Aviation

As the APAC-leading network with over 2,800 global Points of Presence and more than 20 years of technology experience, CDNetworks embraces the new era of Edge and takes it to the next level by using the Edge as a service to deliver the fastest and most secure digital experiences to end users. Our diverse products and services include web performance, media delivery, cloud security, zero trust security, and colocation services - all of which are uniquely designed to spur business innovation.
