

CDNetworks

Media Acceleration VoD

Deliver high quality video on-demand (VoD) anywhere and on any device

CDNetworks Media Acceleration VoD delivers high-quality video on demand to any device running any operating system in any location. Features such as customized caching, intelligent scheduling and control system ensure your media content is always delivered to end users over optimal paths for peak performance and reliability. Integration with Object Storage, media processing, and security protection, CDNetworks provides flexible and secure video on demand acceleration services.

Stable and Fast Streaming

Offer unparalleled user experiences by optimizing content for quick and secure delivery over CDNetworks' global edge network

Security and Protection

Protect online content by encrypting the content itself, securing the distribution process, or controlling viewing access

Adaptive Video Processing

Support multiple codecs to reduce the size of streaming videos for delivery to a wide online audience while ensuring an outstanding viewing experience.

Features

Fast Delivery

Accelerate delivery of media content with CDNetworks' highly efficient CDN to ensure a fast, reliable, and high-quality user experience

High Availability

High quality of service with redundancy is our highest priority when providing smooth video streaming to content providers.

Security

Access control includes features such as token authentication, geo-blocking, and IP whitelisting and blacklisting

Robust Stream Protection

Anti-hotlinking, digital encryption, and copyright mark prevent your content from being copied or stolen online.

Video Configuration

Flexible cache policies for cache configuration, dynamic bit rate, and intelligent video buffering.

Media Processing

Rich media processing features including video/audio transcoding, transmuxing, video editing, etc.

How It Works

CDNetworks Media Acceleration VoD is a comprehensive video on demand solution. Based on CDNetworks' CDN, video processing Center and Object Storage, it assists with the delivery of media content and ensures your audience the best viewing experience!
