

China Premium Service

CDNetworks' China Premium Service (CPS) is a reliable and secure solution that helps organizations deliver fast and seamless connectivity to users located in the Chinese mainland. With this service, organizations can provide their users with access to international websites and applications in the Chinese mainland without any performance or connectivity issues.

No ICP License Required

By utilizing this service, businesses can expand operations in China effortlessly and tap into a larger audience, without the hassle of dealing with rigorous Chinese regulations.

High Availability

Our CPS guarantees minimal packet loss rates of 0%. By utilizing advanced technologies, we optimize delivery of data packets and ensure they arrive at their intended destination without delay.

Low Latency

CPS delivers lightning-fast response times, with latencies as low as 50ms. With CPS, you can rely on fast, reliable, and seamless communication for even the most time-sensitive websites and applications.

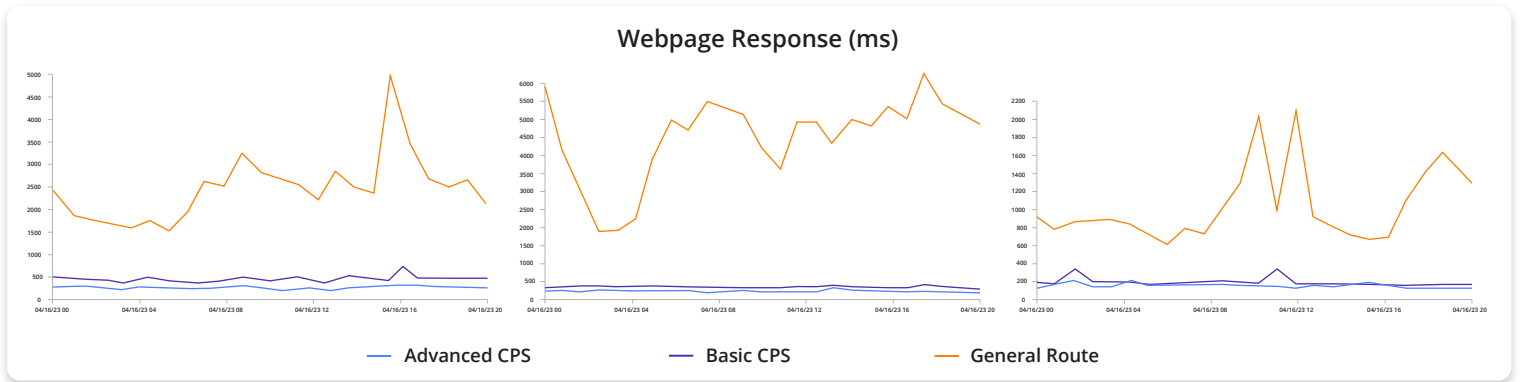

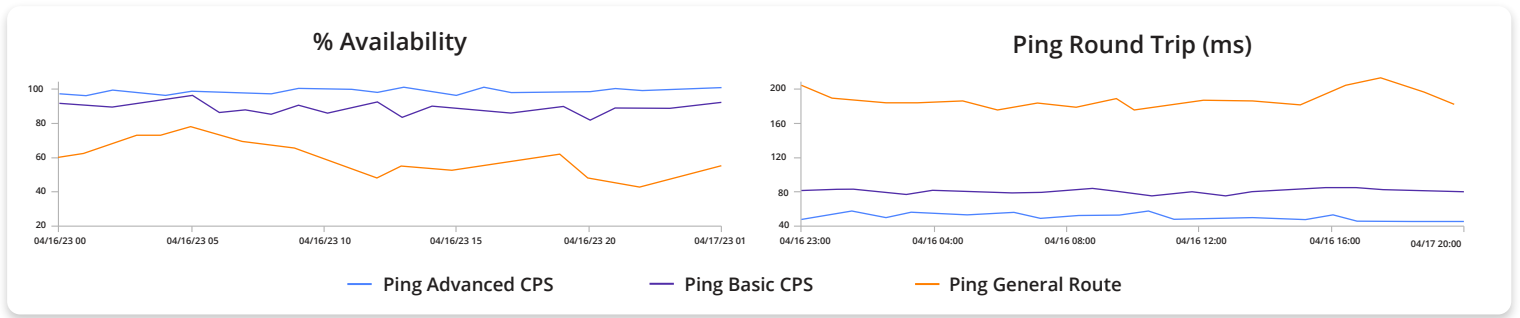

24/7 Support

Our support team is available 24/7 to provide assistance and resolve issues promptly. While every issue is unique, our approach to troubleshooting ensures that businesses can count on CPS to deliver fast and reliable connectivity to their users in the Chinese mainland, free from disruptions and delays.

Available CPS Plans vs General Route

Service	Avg. Latency	Response Availability	Avg. Webpage Response Time	PoP Location
Advanced CPS	50ms	99%	190ms	Hong Kong
Basic CPS	80ms	93%	300ms	Japan
General Route	200ms	60%	2600ms	Global PoPs

Note: The data is sourced from Catchpoint Systems, Inc. Orientation tests used requests consisting of a 100KB PNG image file to measure average webpage response times in milliseconds.

Applicable Products

Web Performance
